**Please select from one of our loose leaf teas below:**

We think tea should be a pleasure from start to finish, not just a vehicle for caffeine. We look for teas which taste and smell enticing both in leaf form and once brewed; teas with a great story behind them; teas which deliver in a way that your average teabag just plainly doesn't. **Our Tea partner is Dragonfly Tea:** A British company with a passion for sharing authentic, delicious and often rare teas.

**Assam Black Tea** - Sourced from one of the finest tea farms in the fertile Assam region of North East India. This is a robust and full-bodied tea which has a rich malty sweetness.

**Camomile** - The delicate, daisy like Camomile flower has been celebrated by herbalists since ancient Egyptian times. Light and fragrant with hints of apple and quince.

**Darjeeling** – Authentic Darjeeling black teas, known as the Champagne of Teas, have a great aromatic quality and delicacy. The tea is golden in colour and has hints of muscatel and wildflower honey.

**Earl Grey** – A blend of black tea with aromatic essential oil of bergamot, a type of citrus found all over the Mediterranean.

**Lapsang Souchong** – A favourite of Winston Churchill and made in the Wuyi Mountains of Southern China this is a bold and smooth tea, with a soft pine smokiness.

**Peppermint** – 100% organic peppermint leaf and nothing else. Fresh and vibrant, with a natural aromatic sweetness.

**Green Tea** – Delicate and subtle with complex aromas and endless variety. Soft and delicate, scented with summer's finest Jasmine blossoms.

**English Tea** – For over 150 years, tea makers have created special blends to perfectly complement the traditional English breakfast. Smooth and full-bodied with a rounded malty finish.
